

TOWN OF SKANEATELES
PUBLIC INFORMATIONAL MEETING
COMMUNITY SOLAR PROJECT

7:00 P.M.

AUGUST 6, 2018

SKANEATELES SCHOOL DISTRICT OFFICE
45 EAST ELIZABETH STREET
SKANEATELES, NY

THIS MEETING WILL ALLOW OUR RESIDENTS TO LEARN ABOUT OUR COMMUNITY SOLAR
PROJECT AND TO CONSIDER SIGNING UP FOR SOLAR CREDITS
LEARN HOW TO REDUCE THE AMOUNT YOU PAY ON YOUR ELECTRIC BILLS AND HOW YOU
CAN REDUCE YOUR CARBON FOOTPRINT
GAIN SOLAR BENEFITS WITHOUT HAVING TO PUT SOLAR ON YOUR ROOF

Please join the representatives of Abundant Solar for a briefing on the proposed Solarize CNY project at the Skaneateles Transfer Station. While Village residents are welcome to attend, we believe that because of the ability for Village residents to obtain electricity at a greatly reduced price, that our residents outside the Village of Skaneateles will gain the most benefit from this presentation and opportunity.

This site is part of a CNY wide municipal drive to build green energy sites to benefit local communities. This proposed Solar array will generate approximately 6.2 MW DC of electricity. This is enough power to serve 1200 homes in the greater Skaneateles area. This power will also offset the towns usage creating cost savings and projectability of electricity costs for 25 years. Town of Skaneateles residents will have first priority to sign up to receive these benefits.

Landfills are ideal sites for solar arrays, as they are not usable for other structures. Come and see what a ballasted Landfill solar array looks like and learn more about how this array will allow residents to save money on electricity, while subscribing to locally generated green and clean energy.

If you are unable to attend this Information Meeting but would like additional Information on this project, please contact the Town Hall at 315-685-3473.
